ARCHIVES DE PUJOL BEGOUEN

1 Aout, 1913.

My dear Prof. Cartailhac:

Your card was received. Many thanks.

I write you chiefly to tell you that I went to Bordeaux yesterday to see Dr. Lallemé's collection. It seems like the most wonderful discovery of the century! I was so excited over it that I actually forgot to ask whether the sculptures were found in the Aurignacian or in the Magdalenian stratum; but M. Peyrony says "Aurignacian". And what a ~~mass~~ of fine silex he has! I also enjoyed a visit to his conservatory.

Unfortunately M Daleau is here at the Congress so I could not see his collection.

Unfortunately too, I was just one day too late. Prof Obermaier and

ARCHIVES DE PUJOL BEGOUEN

M Hernert were with Dr. Lallemé the day before, on their way to Paris.

On my return last night I met Prof Capitan and I also enjoyed his lecture - though he spoke very very fast. I hope to meet him again today.

After thinking it over, I have decided to go to Mentone after all. I have to go to Lucerne to meet Mme Nelson and I thought Mentone would not be very far out of the way.

This afternoon I shall study the Museum collection and at 6 ~~octob~~ o'clock I leave.

My sincere good wishes,

N. C. Nelson.
