

15/9/12.

as from 36, FINCHLEY ROAD,
LONDON. N.W.

Dear M. Cartailhac

To excuse me troubling you again, the beginning of the session is approaching & it is really rather important that I should have the lantern ^{you lent me last year &} slides, such as I wrote to you about during the summer. Can you get them made for me during the next 3 or 4 weeks.

With regard to the specimens, there are no longer so important as Dr Sturge has presented a type set for teaching purposes, still we shall be very pleased to receive (& pay for) anything you may be able to send.

Just at present I am holiday making but hope to send you one or two African things (prehistoric) for your opinion on my return at end of month.

My wife joins in salutations & best regards.

Yrs very sincerely
Ch. Seligman
