

Sept. 6. 1868 226

111

15, College Terrace,

Yorktown

Surrey.

My dear G. L. Sartet

I ought to have mentioned in
my letter yesterday that there
are many fossils from Egypt ^{in the}
Museum of the Geological Society
at Somerset House - namely all
those collected by Lieut. Newbold, ^{of the}

The MS catalogues, in the "Foreign
Collection" upstairs, will enable you to
have them found for your inspection.

I have duly received, from London,
D. P. Broca's valuable Manuscript.

and will translate it as soon as
I can. I see that there
is only one woodcut to be
returned to M. Broca; & that one
was sent, some time ago, to
No 4 St. Martins Place (Anthro-
pological Society), addressed to
Dr Broca, "in care of C. C. Blake,
Esq." — and you ~~can~~ (or Messrs Taylor
for you) can get it there easily.

I do not know when I shall
be able to come to Town; but

I will call & see you &
Mr Smith when I come.

I am very glad that you have
fine weather in England.

With Our Kind Regards,

I remain, dear Sir,

Yours very truly

Wm Pitt Rivers

to Mr. Sartorius.

W.P.R.

I do not think it

will be right for all your
Memoir with all our cuts
to be reprinted in France, as it
would injure the sale of the
Relig. Aquisit. - but I will
speak about the matter to
the Executors &c. when I go to
London. I understood it
was contemplated only to print
an abstract of, - or extracts
from, the Memoir, in France.
